# 'STILL' at last...

get a **REST**, find your **FOCUS**, stay **CALM**, add 'VALUE' to Work Culture!

designed by Ece Yalım Design Studio

Ece Yalım - Oğuz Yalım

"...as a design team, we are after pointing out real matters, seeking out real needs and adding value to people's lives with the products we design answering those needs..."

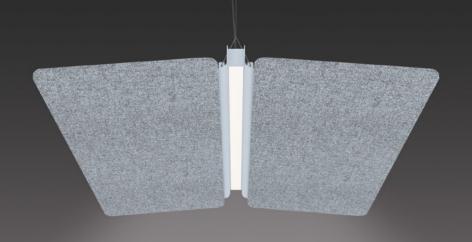

...we do not limit ourselves with direct users' demands only, we care a lot about the interaction an architect or an interior designer may build with our products, to unleash their creativity in constructing the space..."

Work culture is what makes a company valuable...

STILL Acoustic Lighting Series is designed to add more value to your office culture and answer light and acoustic needs in one product, concentrating not only on the vision but also on other senses. The integration of acoustic panels and light unit brings 'Values' to office spaces such as 'Serenity' 'Concentration' and 'Comfort' leading to motivation, creativity, ease of cognition and of course harmony in a work environment...

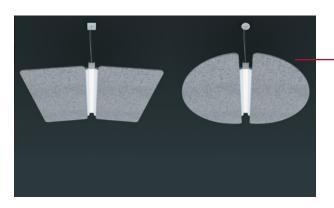

#### **Get a Rest**

REST 'Hybrid' lighting unit focuses both on vision and acoustic problems of todays' main issues in open office areas. Integration of acoustic panels to the light fixture offers efficient work light that also proposes better acoustic level which leads more concentration and emotional wellbeing as much as physical one.

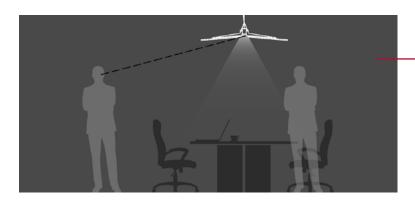

#### **Wings in Basic Forms**

It is a LED linear lighting which holds acoustic panels on both sides, mounted on middle spine. It proposes clean and harmonious ceiling look preventing the cabling chaos above.

Panels which comes in two different basic form options, brings rhythm offering aesthetic richness especially in multiple use. It turns into an interior design element creating an acoustic ceiling level.

#### **No Glaring For Others**

Recessed LED linear light at the groove created by beveled panels protects users from typical glare. Panels decrease stress level by absorbing the noise in open office. The embracing roof-like wings proposes comfort, defining a personal work space.

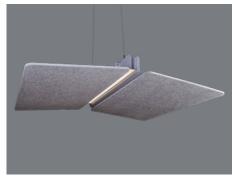

#### **Multiple Usage**

Common way to solve noise problem is to hang acoustic panels from ceiling, unfortunately juxtaposing and jamming with hung light fixtures.

REST acoustic lighting answers this problem in one product, helping interior designers and architects manage the situation practically, harmoniously and aesthetically.

#### Sustainability

Simple form language of product with just a minimum material usage and exposed mounting detailing propose clean look besides its' easy maintenance, easy replacement of panels through time.

# **FOCUS**

#### **Find Your Focus**

FOCUS; 'Hybrid' acoustic lighting concentrates on not only the vision but also noise problem that is a main issue in open office environments. This integration aims for physical and psychological wellbeing, brings concentration and serenity and lessens stress in work spaces.

Easy way to solve noise problem in open offices is to hang acoustic panels from ceiling, unfortunately jamming with light fixtures in the same locations. Focus answers the problem in one product, helps interior designers and architects handle the situation practically, harmoniously and aesthetically.

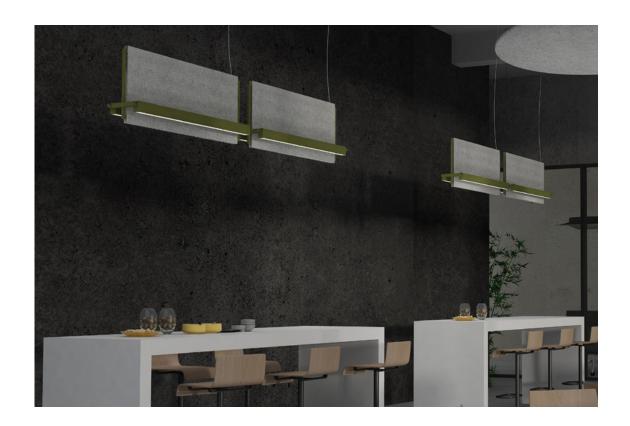

#### **Serving Both Sides**

Double lights and panels best function in face to face work tables, supplying enough illumination for both sides. Two acoustic panels having a gap in between, acting like a sound barrier.

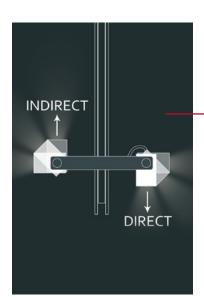

#### **Multiple Usage**

Multiple usage proposes good sound absorption and strong aesthetic input in crowded areas for example seminar rooms, class rooms, cafeterias...

#### **Adjustability**

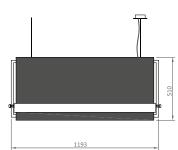

Its' structure holding acoustic panels on both sides, carry two linear lighting fixtures that serve as effective lightings on both sides for two users.

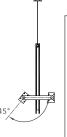

They are adjustable individually to match desired angle directly focusing at working area on the table or for indirect use.

STAY Ring

#### **Stay Calm**

STAY is a lighting fixture family that answers the common tendency of using geometrical forms of light in cotemporary interiors by means of LED lighting technology.

But It does it by carrying the hybrid approach of of STILL acoustic lighting series and entegrates acoustic panels with lighting units. The purpose again is to answer both senses; vision and hearing, to be able to solve the acoustic problems of todays' office structures.

#### **Acoustic Ceiling**

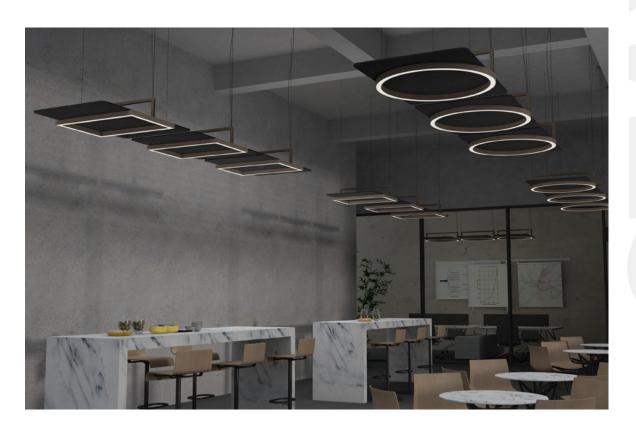

Lighting units define almost a new level of acoustic ceiling, with their integrated panels. The design proposes one mutual solution having two comfort elements coincide on one fixture, providing benefit for both direct users such as the office employees and the indirect users such as interior designers.

#### **Interior Design Element**

STAY, with its apparent and distinctive feature at a different level then existing ceiling, it will allow to empower the usage scenario and circulation schemes of the space or to create subdivisions to enhance the plan layout in bigger perspective. Powerful geometrical language will let the product carry the role as a definitive interior design element apart from being a lighting unit, underlining special areas in the space, such as info desks, counters etc..

STAY Bar

#### Stay-BAR

As being another member of STILL Series, Stay-BAR is designed as a multi functional product which carries acoustic panels when used in pair, aiming to offer a solution to a certain extend for commonly defined acoustic problems in work environments, while answering todays' Linear LED lighting demand.

BAR implements the multi task mission of STILL Acoustic Lighting Series in a very humble way by means of its straight forward design solution and simple form language.

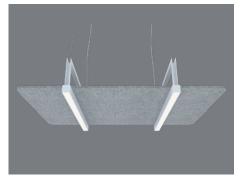

#### **Multiple Usage**

The fixture, may present either a still appeareance totally integrated to the space just like a ceiling, or a dynamic, rich visual language, depending on the different rhythmical applications preferred by interior architechts.
